

Vaxxed II: The People's Truth

Why Everyone Needs to See This

Gary E Foresman MD

January 2020

The documentary films Vaxxed and Vaxxed II record the ongoing issue with vaccine injury and the Big Pharma/CDC coverup allowing for the privileged in society to make billions of dollars while maiming and massacring our children. All the while, the rich use mainstream media to dupe the unsuspecting masses into the ritualistic sacrifice of our children, while paying their false gods (capitalism) to use them/doom them.

Hopefully I have your attention, After the Vaxxed II event in Morro Bay two weeks ago, I did one of many interviews to discuss the complicity of our medical system in this intentional cruelty (watch that interview here: <https://www.youtube.com/watch?v=TQSyhOXYIHw>). Vaxxed II simply documents parents' experiences with vaccines and the experiences of parents who do not vaccinate. The global suppression of this movie tells you that it is "spot on".

Throughout my career, I have seen many Medical Industrial Complex coverups. The suppression of the voices of those of us who have seen behind the curtain of disinformation regarding vaccines will rival Big Tobacco and Big Oil. Unfortunately, this is no overstatement.

Undisputed facts:

- Big Pharma has absolutely no responsibility for any complication ever from the injectable drugs known as vaccines.
- Big Pharma has been named responsible but not held accountable for hundreds of thousands of deaths, think Vioxx and the current narcotic scandal.
- Doctors just unwittingly prescribe what is told to them by "authorities", regurgitating excuses like "standard of care" for their practices. (This statement has opinion yet is factually accurate.)
- The Health Resources and Service Administration just (01/2020) reported on the (NVICP)National Vaccine Injury Compensation Program – see that report here: <https://www.hrsa.gov/sites/default/files/hrsa/vaccine->

[compensation/data/data-statistics-vicp.pdf](#) Do you not find it interesting that vast numbers of injuries occur for something with “no side effects”?

- Since 1988, over 21,491 petitions have been filed with the VICP. Over that 30-year time period, 18,473 petitions have been adjudicated, with 7,044 of those determined to be compensable, while 11,429 were dismissed. Total compensation paid over the life of the program is approximately \$4.2 billion. (quoted from above link)

As vaccine injuries aren't even recognized by the medical industry, that anyone has fought this cruel and vicious watchdog for Big Pharma should amaze you all. The actual number of tax dollars that you and I should have paid for vaccine injury is easily estimable at 100 fold to 1,000 fold the \$4.2 billion paid as barely one in one hundred vaccine injuries are reported, and of those at best one in 10 will even make it to this court.

So, a completely unethical Big Pharma, completely freed from any liability, convinces government to mandate to inject harmful drugs into our children, what could go wrong?

A vaccine is an injectable poly-drug with wildly unpredictable effects from salubrious: prevention of the infection intended, to nefarious: neurotoxicity, allergy, asthma, immune dysregulation from autoimmunity to immunosuppression, seizures and death. Each drug has a risk to benefit ratio and must be considered this way. Each parent, each individual, must rethink everything about vaccines, and make **informed** decisions. If your healthcare practitioner recommends following any vaccine schedule recommended from the CDC or any other advisory board, you know they can't or won't think for themselves.
